

<b>General programming knowledges</b>	constants, variables
	data types: string, number, array, object, hash
	Operations ( +, -, *, /, %, ==, &&, ...)
	conditional (if else, switch case, ....)
	loop (while do, for, ...)
	functions (methods)
<b>Data structures</b>	Array, Linked list
	Stack, Queue
<b>Database</b>	MySQL Data Types
	MySQL Create Database
	MySQL Create Table
	MySQL Primary Key
	MySQL Unique
	MySQL Auto Increment
	MySQL Foreign Key
	MySQL Table Types & Storage Engines
	Lệnh cơ bản như INSERT-DELETE-UPDATE-DROP-ORDER-BETWEEN
	3 loại liên kết
	Query cơ bản, lệnh Join trong DB
<b>OOP</b>	object, class, property, method
	public, protected, private;
	abstraction, inheritance, encapsulation, polymorphic
	Abstract Class
	Interface
<b>MVC</b>	Model
	View
	Controller
	Workflow
<b>HTTP</b>	request, response, header, body
	methods (GET, POST, PUT, DELETE, PATCH)

<b>Algorithm</b>	Sort, search
<b>Other</b>	HTML, CSS, JS Command line tool
